TECHNICAL SPECIFICATIONS

Documents; Manufacturer company, **ISO 9001:2015** quality assurance system and **EN 61587-1 15.01.2018, 61587-2** in the production of 10" cabinets.(Mechanical structures for electronic equipment) standards and submitted in the tender dossier.

Standards: Cabinets must be 19" in ETSI and/or EIA 310-D standards.

Dimension: Cabinet must be height (26U,42U)

- Width : 800mm
- Depth : 1000mm

Main Frame and Profile Structure; The main body of the cabinet is consisting by front and rear welded frames + bottom and upper lateral bars. Front and rear welded type monoblock frames should be made of t=1.50mm sheet metal material. Each corner profiles should have 6 bending points with an aesthetic appearance, each multifolded profiles must be with an angle of 45 degrees bending points for increasing the mechanical strength. There should be no burrs and sharp edges for eliminating the injury during the installation, welding and mechanical connection points on this frame must be comply and tested to provide axial (x, y, z) strength of the cabinet. **EN 61587-1 / 5.2.1 / 61587-2** and **5.2.2**, resistance to external impacts **EN 61587-1 / 5.3.3 / 61587-2**, dynamic load, vibration and mechanical impact (**IEC 60068-2-6** , **IEC 60068-2-27**) test results must be documented by TSE.

Bottom Plate; must have cable access that would block dust inlet. Bottom case 1 qty 129x300mm cable entry with sliding cover, 2 qty 56x300mm M-joint cable entry. 1ea. 150x300mm M-joint cable entry in 800x1000mm cabinets.

Top Plate; must be compatible with 6 way fan unit installation, + 2 qty M-joint type cable entry with dimensions 300x56mm.

Rear Door; must be full length solid metal with single barrel lock mechanism.

Side Panels; must have a structure that can be openable and removable by 2 sliding latch locks and one barrel lock with key.

Front Door; Glass structure must be tempered, anti-static, secure glass with 4mm thickness according to **EN 12150-1:2008** standard. front door must have left and right metal frames structure with high density silicone, screws and nuts, structure that open 135 degrees , removable by spring hinge , lockable with swing handle lock.

19" Mounting Rails; are 4 pcs and adjustable throughout the entire depth of the cabinet and thickness must be 1.5mm, silk-screened. It must provide ability to count "U- Marking" from top to down & down to up for easy device installation, the structure of mounting rails should have been manufactured with a precision of +/- 0.01 on CNC punch benches with 9.5x9.5mm square holes in 1U=44.45.

Lateral extension parts; It must be 4pcs for each cabinet. The structure of the multifolded lateral extension parts has been designed for placing between the front and rear monoblock welded main frames..

Paint; Cabinets must provide high resistance against the external impacts. It should be painted with electrostatic RAL9005 black powder paint or RAL7035 white powder paint. (**ISO 9001:2015**). It should withstand 1000 hours of salt test and test result reports should be documented. (**TS EN 60068-2**).
